## 👤 PROFILE

### 📍 About Me

I am a react developer with 4 years of professional experience and have already worked with Yelp and Adobe. I graduated with a Master's In Computer Science in 2018 and I now live in Hamburg, Germany.

## 📁 EMPLOYMENT HISTORY

### 📍 Fullstack Developer / Founder at Elecular UG, Hamburg

April 2020 — September 2022

- Built an experimentation platform using **React**, **Node.js**, and a **cloud platform** (GCP) to enabled rapid testing without coding knowledge for designers.
- Raised €35,000 to develop a mobile game prototype

### 📍 React Developer at Yelp, Hamburg

October 2018 — June 2022

1. **Offline Attribution:** Developed reporting dashboards that attribute offline visits to online ads. This is used for inbound customer acquisition and driving higher sales.
2. **Reporting Tools:** Developed dashboards that report ad performance metrics to our clients. This gave our enterprise clients more confidence in our ads delivery service, thus driving higher sales.
3. **Hiring:** Did technical interviews to asses and select the best software engineers for Yelp.
4. **Mentoring:** Onboarded new hires onto our team and enabled them to deliver value as soon as possible

**React, AWS, Docker, Kubernetes,** and **Python** were maily used in this job

### 📍 Fullstack Intern at Adobe, Edinburg

June 2016 — September 2016

Monitoring Systems: Built monitoring for message broker systems (Kafka) to raise alerts in case of bottlenecks in data flow. This gave our stakeholders more confidence in publishing and receiving messages.

**React** and **Node.js** were used in this job

## 🎓 EDUCATION

### 📍 Master's In Computer Science, University Of St. Andrews

September 2013 — September 2018
